Subject: FW: Speeds on the track in Whistler

Fendt and I talked about this at the World Cup. His worry is how much the calculations were out with our track and what this means for future tracks. There is nothing to do on our side but does put in writing concern about the speeds of the track if there was ever an incident.

Subject: Speeds on the track in Whistler

Dear Tim! Dear Mr. Gardella!

For your information, I'm attaching the English version of the letter Mr. Fendt has sent to IBG Consulting Engineering in Leipzig regarding their calculation work done on the track in Whistler.

Best regards
